- HR Circus casino Namur : Camille Bastais

Profil

I'm a conscientious and methodical person, who takes every detail into account to ensure that my work is as complete as possible. I was able to perfect my experience in the IT field by working on different equipment during my training at Technobel. I also acquired other skills by preparing for various cybersecurity certifications, during a company project and a jury project. The latter enabled me to work on forensic methodology, as well as my management skills during the company project.

Education and work experience

Secops-oriented cybersecurity consultant training
